APAC – Investment Banking Dept Summer Analyst

Description
The Summer Analyst program is 10 weeks long and is designed to give penultimate year students a comprehensive exposure to the investment banking industry and a comparable experience to that of a First Year Analyst.

As a Summer Analyst program participant, you will be exposed to a broad array of assignments over the period of the program, including at least 1 or 2 live transactions where you will be either working alongside a Full-Time Analyst or staffed as the only Analyst on the deal team. Our bankers execute and structure mergers and acquisitions, raise capital for clients in the equity and debt capital markets, guide companies through financial restructuring, discuss strategic alternatives with management teams, and provide a wide range of other advisory services. You will work alongside some of the industry’s best bankers and have exposure to senior business leaders at a diverse set of corporations and organizations.

You could find yourself doing any or all of the following: analyzing companies using financial modeling and valuation techniques, examining the impact of a transaction on a client’s capital structure or analyzing the consequences of a merger or acquisition. This will give you hands-on experience on the actual work that we do on a day-to-day basis, and offers you valuable opportunities to interact with Credit Suisse professionals and our clients at all levels, and building a network both inside Credit Suisse and outside that will strengthen your career throughout your professional life.

Summer Analysts are formally reviewed at the mid and end points of the summer, with offers made towards the end of the program, enabling you to return to school with a full-time position secured.

Our program opportunities span primarily across Hong Kong, Singapore and Seoul.

Training
Regarded as one of the best and most comprehensive summer programs in the region, Credit Suisse’s Summer Analysts receive a full week of initial training which orients them to the Firm and provides an overview of financial modelling, valuation tools, comparable analysis, database skills, and various banking products. This is usually centrally done in Hong Kong, our biggest office in the region, where you will be able to interact and network with other Summer Analysts and Associates across the various countries.

During the 10 weeks internship, you will then receive in-depth training and sharing sessions in smaller groups to gain deeper insights about the various industry groups and products we have in the region. You will also be assigned buddies and mentors to guide you along and teach you the ropes of the trade, as well as bankers in your respective groups who will be responsible for staffing you on deals and giving you feedback on your overall development.

Other than work assignments, you will also get to know the Credit Suisse culture intimately through our team events and other social events. There will also be various social, philanthropy and diversity events, all of which are intended to broaden your 10 week experience at Credit Suisse.

At the end of it, you would have acquired the tools you’ll need to jump start your career in investment banking.

Qualifications
Interested candidates must be a penultimate year student from a Bachelor or Master’s degree program, and have a strong interest in building a career in the Asia Pacific region. Strong verbal and written knowledge of an Asian language, preferably Mandarin, though not a pre-requisite, would be considered favorably in your application. Credit Suisse is noted for the diversity of its employees, and seeks passionate candidates with a common set of abilities – highly motivated and creative individuals who have demonstrated academic achievement, and have the ability to work independently and as a member of a team. We’ll be looking at your potential, your ability, your academic background and your extracurricular activities. We’re looking to build future leaders who add fresh perspectives to our business.

Whatever your background, you’ll need to be:

- A motivational leader with a strong sense of personal integrity; able to inspire confidence and loyalty
- Self-motivated and resourceful; able to multi-task and focus on delivering results
- An enthusiastic team member who collaborates well with others and builds strong working relationships
- An articulate communicator with strength in both verbal and written communication
- Resilient, flexible, open to feedback and focused on achieving excellence
- Client-focused and committed to developing creative solutions
- Analytical and logical, with raw intellectual ability
- Highly numerate with a strong interest in finance
- High in computer literacy with advanced knowledge of common office applications

Credit Suisse Firm Overview
