Vyond - Data Analyst

About the company

At VYOND, our mission is to put the power of video in the hands of everyone. Vyond allows people of all skill levels in all industries and job roles to create dynamic and powerful media. With features that go beyond moving text and images, you can build character-driven stories or compelling data visualizations that engage audiences and deliver results.

Founded as GoAnimate in 2007, Vyond has helped Global 2000 organizations, small businesses, and individuals produce more than 30 million videos.

With offices in Silicon Valley, Hong Kong, and Taiwan, Vyond employs a team of people whose creativity extends well beyond our office walls. We are passionate about the power of video and how it makes the static dynamic and transforms the mundane into the captivating.

VYOND™ is a trademark of GoAnimate, Inc.

About the role

In your role as Data Analyst you will work on a variety of data tasks as required by the team, including:

- Create a robust design of data repository schema for the organization, including multiple system integration and address issues of data migration.
- Develop a scalable data management system that align with data classification standards.
- Maintain the integrity of data, keep records up-to-date and accurate.
- Create reports and queries to test and analyze data from various repositories and bring the desired output from the data.
- Capture detailed knowledge of the data/information processes (source systems, raw entities, and attributes) and develop required documentation.
- Assist the Data & Growth team to develop a clear data strategy and to conduct benchmarking studies.
- Facilitate different teams to determine data requirement to satisfy business needs and support analytics business initiatives.
- Able to learn best practices for data management and data processes and support the Information Security team to implement data security across multiple platforms.

Candidate requirements

- Bachelor degree or above in Computer Science or equivalent.
- Attention to detail and think-outside-the-box mentality.
- Strong analytical and problem-solving skills.
- Able to work independently and learn on-the-fly.
- Hands on working knowledge on a relational database management system, such as SQL Server, Oracle or MySQL is required.
- Experience with high level programming languages is required, e.g. PL/SQL, Python, Ruby.
- Knowledge in Amazon Redshift, Big Data, Data Mining / Modelling & Hadoop is a plus.
- Good communication skills.
- Fluent English is a must, Cantonese proficiency is desirable.
Application Method

Interested parties please send your resume (including present and expected salary) with applied position title by email to hr@vyond.com

All personal data provided will be kept confidential and used for recruitment purposes only. Applicants who are not contacted within eight weeks may consider their applications unsuccessful. The Organization will retain their applications for a maximum period of twelve months and may refer suitable applicants to other vacancies within the Organization.
Vyond - Junior Engineer
Full Time | Hong Kong

About the company

At Vyond, our mission is to put the power of video in the hands of everyone. Vyond allows people of all skill levels in all industries and job roles to create dynamic and powerful media. With features that go beyond moving text and images, you can build character-driven stories or compelling data visualizations that engage audiences and deliver results.

Founded as GoAnimate in 2007, Vyond has helped Global 2000 organizations, small businesses, and individuals produce more than 30 million videos.

**VYOND™ is a trademark of GoAnimate, Inc.**

About the role

In your role as Junior Engineer you will work on a variety of Engineering tasks as required by the team, including:

- New feature development
- Issue investigation and resolution
- Resolution verification / testing automation
- Researching new technologies

Your personal preference, ability and the needs of the team will dictate the projects you will work on, including front-end, back-end, database and client (Flash / Flex) development.

Your career progression to more senior engineering roles will be determined exclusively by the demonstration of your ability and the results you achieve.

Candidate requirements

- Bachelor degree or above in Computer Science
- Knowledge of at least one OOP language (e.g. Java or C++)
- Working knowledge of PHP, Actionscript, HTML/CSS/JavaScript would be beneficial, but not essential
- Previous working experience in agile development teams is a bonus
- Attention to detail and think-outside-the-box mentality
- Good command of English

Application Method

Interested parties please send your resume (including present and expected salary) with applied position title by email to hr@vyond.com

All personal data provided will be kept confidential and used for recruitment purposes only. Applicants who are not contacted within eight weeks may consider their applications unsuccessful. Vyond - Software Tester
Full Time | Hong Kong

About the company

At **VYOND**, our mission is to put the power of video in the hands of everyone. Vyond allows people of all skill levels in all industries and job roles to create dynamic and powerful media. With features that go beyond moving text and images, you can build character-driven stories or compelling data visualizations that engage audiences and deliver results.

Founded as GoAnimate in 2007, Vyond has helped Global 2000 organizations, small businesses, and individuals produce more than 30 million videos.

With offices in Silicon Valley, Hong Kong, and Taiwan, Vyond employs a team of people whose creativity extends well beyond our office walls. We are passionate about the power of video and how it makes the static dynamic and transforms the mundane into the captivating.

**VYOND™ is a trademark of GoAnimate, Inc.**

About the role

In your role as a Software Tester, you will help the Engineering team producing a better software by discovering bugs before they reach our end users and by liaising with our engineers to get them fixed, such as:

- Design and execute test plans and test cases
- Reproduce, triage and prioritise bugs on a daily basis
- Write bug reports
- Write automated test cases and scripts

Great attention to detail and good documentation skills are essential for this role.

This role is suitable for a Junior Engineer with excellent attention to detail and great organization skills.

Candidate requirements

- Bachelor degree in Computer Science
- Able to work independently
- Attention to detail and think-outside-the-box mentality
- Hands on experience with Software Testing, especially Web Apps
- Some knowledge of scripting languages such as Bash or Javascript desirable
- Experience in testing automation is a plus
- Good command of English, especially written

Application Method

Interested parties please send your resume (including present and expected salary) with applied position title by email to hr@vyond.com
