GreySpark Partners provides the expert advice necessary to deliver change to investment banks, hedge funds and asset management firms. The deep understanding of the financial services sector we have gained through our collective experience, creativity and tenacity enable us to consistently deliver the best results for our clients.

Financial services firms today must be flexible and forward-facing in order to face an ever-evolving regulatory landscape, changes in market structure and the ongoing need to reduce costs. **GreySpark’s Business Consulting** services provide the advice, strategy and implementation services necessary to improve and optimise business functions and help our clients to continue delivering differentiated and profitable solutions.

Our team works closely with each client to identify, create and realise a bespoke approach that tackles their most pressing business needs and adapt to ongoing industry changes.

**Job Responsibilities:**

Determine operational objectives by studying business functions; gathering information; evaluating output requirements and formats.
Construct workflow charts and diagrams; studying system capabilities; writing specifications.
Improve systems by studying current practices; designing modifications.
Recommend controls by identifying problems; writing improved procedures.
Monitor project progress by tracking activity; resolving problems; publishing progress reports; recommending actions.
Prepare technical reports by collecting, analysing and summarizing information and trends.
Perform analyses of current processes using operational metrics and reports.
Understand and communicate the financial and operational impact of any changes.
Suggest changes to senior management using analytics to support your recommendations. Actively participate in the implementation of approved changes.

**Job Requirements:**

Bachelor’s degree in Computer Science, Information Technology, Finance etc.
Entrepreneurial spirit, personal and professional integrity with a strong desire to succeed.
A team player with good interpersonal and communications skills.
Basic technical understanding (able to understand SDLC and read Java/ other codes, SQL etc.)
Knowledge in Capital Markets/ Investment Banking or a particular asset class will be a plus.
Knowledge of financial data, financial instruments and financial technology will be advantageous.

**What we offer:**

A challenging and varied role in a Capital Markets Consulting firm.
The ability to grow and attain levels of seniority within a growing company.
The chance to join a creative, energetic and dynamic team of people.
Competitive package, including bonus and benefits, to successful candidates.

**Technology Consultant**

**Java Developer**

GreySpark Partners provides the expert advice necessary to deliver change to investment banks, hedge funds and asset management firms. The deep understanding of the financial services sector we have gained through our collective experience, creativity and tenacity enable us to consistently deliver the best results for our clients.

**GreySpark’s Technology Practice** has a deep understanding of not only the technology currently available and in use today, but also the trends and innovations that our clients will be using in the future. In a fast-paced industry where technology is often a key differentiator, we make it our business to help our financial services clients successfully adopt modern computing tools, techniques and approaches.

Our consultants provide a number of services within the capital markets technology space, ranging from small, focused, advisory engagements to architecture, design, development and operations projects.

**Job Responsibilities:**

- Reviewing current systems.
- Presenting ideas for system improvements.
- Working closely with analysts, designers and staff.
- Participate in all phases of the software development life cycle.
- Manage functional specification, system testing, UAT and implementations by writing well designed and testable code.
- Testing the product in controlled, real situations before going live.
- Coordinate with team lead and project managers in fulfilling business requirements within deadlines.
- Work on our client sites on a variety of projects of varying scale.

**Job Requirements:**

- Bachelor's degree in Computer Science, Information Technology, Finance etc.
- Entrepreneurial spirit, personal and professional integrity with a strong desire to succeed.
- A team player with good interpersonal and communications skills.
- Experience in Java, Javascript, SQL, Spring framework, Unix/Linux etc.
- Knowledge in Capital Markets/ Investment Banking or a particular asset class will be a plus.
- Knowledge of financial data, financial instruments and financial technology will be advantageous.

**What we offer:**

- A challenging and varied role in a Capital Markets Consulting firm.
- The ability to grow and attain levels of seniority within a growing company.
- The chance to join a creative, energetic and dynamic team of people.
- Competitive package, including bonus and benefits, to successful candidates.
