Machine Learning/AI Developer

Full-time graduate position under the Department of Computer Science and Engineering, The Chinese University of Hong Kong

Job Description

We are looking for an individual who has a passion for education and communication to help share KEEP's vision and mission with Hong Kong and the world. The KEEP (https://www.keep.edu.hk) and the VeriGuide (http://www.veriguide.org) are projects that provide online resources to support faculty teaching and student learning needs. You will be involved in using the latest software development methodologies to develop the core products that make KEEP relevant, as well as be able to work on an innovative product called VeriGuide, a plagiarism detection system. Fresh graduates are also encouraged to apply, as long as the candidate is motivated to learn in a dynamic environment.

Requirements

Applicants should have:

- a Bachelor's degree or above in Computer Science, Software Engineering, Information Technology or related disciplines
- 3-5 years of prior development experience
- Good analytical, organizational and communication skills, and creativity
- Interpersonal skills to work independently, as a team, and on multiple projects
- Command of back-end technologies, machine learning techniques, big data, and AI.
- Experience with Python, Ruby on Rails, PHP, Java, SQL, etc is a plus
- Familiar with various operating system environments, including Windows, Linux, Mac OS X, etc.

Application Method

Please apply via the Career Section of the CUHK website (https://www.hro.cuhk.edu.hk/career-opportunities).
