## About PwC, LoS & BU

**About Consulting**

PwC Consulting China/HK is a leading consulting practice focused on creating sustainable value and lasting change for our clients, helping them address their most complex business issues from strategy through execution. With dedicated consultants in Beijing, Shanghai, Hong Kong, Guangzhou and Shenzhen, PwC Consulting China/HK is part of a global network of firms in 158 countries with more than 180,000 people. With direct investment from PwC US and PwC Australia, PwC Consulting China/HK has the additional leverage of over 39,000 consultants with experience in every industry sector as well as access to their market leading intellectual property and practices. We serve clients in a variety of industry sectors across China and Hong Kong. For more information, please visit our website [www.pwccn.com/consulting](http://www.pwccn.com/consulting) (for China), or [www.pwchk.com/consulting](http://www.pwchk.com/consulting) (for Hong Kong).

**About Risk Consulting**

We support clients in identifying, understanding and managing risk and help ensure an appropriate balance between risks and opportunities. Also, we assist businesses in designing and implementing governance and compliance programs to ensure that the company continues to operate within the boundaries of relevant legislation and regulations. This includes building a culture of doing the right thing. We bring in-depth knowledge in the following fields:

- Provides risk consulting services mainly Financial Services clients
- Credit risk: credit risk modelling and associated recommendation, credit operational risk
- Market risk: financial instrument valuation, trading strategy
- Insurance risk: life/non-life, actuarial valuation
### The Experience

As a Risk Consulting Placement Intern, you will have the opportunity working on projects leveraging your quantitative degree and expertise. In this placement programme, you will find yourself working with house hold Financial Services Institutions names help them more confidently make decisions to drive performance. You will gain valuable hands-on experience working alongside leading professionals and build strong and well-rounded Risk Consulting skills early in your career. Your focus and every day project experience may include:

- Assist client teams in understanding and quantifying risk exposures, evaluating risk strategies, building and maintaining risk models focusing in the area of Credit Risk, Liquidity Risk and Market Risk.
- Gather and analyse information, formulate and test hypotheses, develop and provide proactive solutions in enhancing business efficiency
- Conduct modelling related to valuation of derivatives (fixed income, equity and other complex financial instruments), and statistical projection and analyses (e.g. time series, survival analysis, etc.)
- Support clients in their most pressing regulatory challenges through reviewing and developing client’s internal policy, conducting process revamp and provide proactive recommendations to mitigate and manage enterprise risks.
- Contribute to knowledge development by helping define and expand distinctive risk based methodologies

### Your Growth

Through your wide variety of experiences at PwC Risk Consulting, you will have the opportunities to develop the analytical and communication skills to help achieve your potential, no matter what career path you eventually choose. It provides the unique opportunity where you will work with our Risk Consulting team on real business problems, develop insights and gain first hand real-life exposure to the challenges and day to day work a consultant experienced. Along the way, you will have access to mentoring and opportunities to help accelerate your growth and development of new capabilities and skills. Our internship programme is the start of an exciting career in PwC Consulting. Perform well and you may be given the opportunity to join our Graduate Programme upon completion of your university studies. Embarking on a new career can be one of the most exciting times in your life.

### Requirements

- Undergraduate, preferably in Quantitative Finance, Statistics, Mathematics and Risk Management. Priority will be given to students at their penultimate year of study
- Knowledge in financial modelling, analytics and quantitative techniques
- Strong analytical and problem solving capabilities
- Intellectual rigour, flexibility and agility
- Good team player and enjoy working collaboratively with people from a variety of backgrounds
- Proficiency in MS Office applications including Word, PowerPoint, Excel and Access
- Practical experience in using statistical software (e.g. SAS, R) and programming languages (e.g. VBA, MatLab) is an advantage

Job Description & Responsibilities

The Experience
The Consulting Internship program is an essential element in our people strategy.

By working with our business, marketing and technology experts, you will have exposure to different projects for clients in various industries and functions e.g. sales and marketing, accounting and finance, technology and operation, human resources, marketing, etc.

Your everyday experience may include:
- Analyse business problems by conducting research and analysis, under the guidance by senior consultants
- Develop prototype and/or perform proof-of-concept to apply technologies (e.g. HRIS, finance system, robotics, etc.) to solve business problems
- Participate in agile development cycles, taking roles in storyboarding, coding, integration, testing, etc.
- Apply business insight to design enterprise applications e.g. Oracle, SAP, Salesforce.com, Workday, etc.
- Liaise with offshore development teams to deliver programming tasks
- Support project management activities
- Support executive presentations and events

Your Growth
You will gain hands-on experience in solving business problems through technology enablement. By working with seasoned business professionals in multiple disciplines, your exposure to both the business world and consulting skills (e.g. storytelling, design thinking, project management, etc.) will build a solid foundation of a successful career in any modern business environment.

Along the way, coached by our senior professionals and having ample opportunities to interact with client personnel at all levels, you will accelerate your growth and acquire knowledge that will benefit your future career.

Our internship programme is the starting point of an exciting career in PwC Consulting. With good performance, you may join our Graduate Programme upon the completion of your university studies. Embarking on a new career can be one of the most exciting times in your life.

Requirements
We are looking for candidates who are:
- Good team player (at PwC, we put team work above and beyond everything)
- Penultimate year students in Information Systems / Computer Science / Engineering disciplines preferably with a second major/minor in Accounting / Finance / Operations Management / Decision Science / International Business / General Business
- Knowledge and experience in programming and/or data analytics will be an advantage
- Passionate about coding, problem solving and collaborating with people
- Self-motivated and able to work independently
- Follow closely on technology trends and their business application/disruption
