Actuarial Analyst – Internship (6 months)
Swiss Re is one of the leading global reinsurers. We offer a wide range of traditional reinsurance products and related services, which are complemented by insurance-based corporate finance solutions and supplementary services. Our core business segments are: risk transfer, risk finance and asset management.

The L&H BM Division covers the management of Swiss Re's L&H business and is responsible for the entire cycle of reinsurance treaties including treaty administration, technical accounting, claims management, reserving, financial reporting and management reporting. The BM Division also maintains and improves business performance by working together with Client Markets, Products and Asset Management. Within BM, Actuarial Management has responsibility for valuation, capital planning, financial reporting (US GAAP), management reporting (EVM) and statutory reporting (Swiss Statutory, local statutory bases in Swiss Re's carriers in Asia).

The Opportunity
Once hired for this position, you will be part of Asia Actuarial Management and will share in responsibility to support the tasks of the team. You will gain experience through working in the diverse markets in Asia, with primary responsibilities including but not limited to support for:

- Quarterly financial and management process and reporting
- Reinsurance treaty management
- Experience investigation, assumption review and assumption setting
- Quantitative result and impact analysis
- Ad-hoc projects as required

About you
- Actuarial student with exceptional academic performance and progress in exams with a recognised Actuarial body (IoA, IAA, SoA, CIA)
- Goal oriented and strong team player
- Strong analytical skills, and the ability to handle both conceptual and practical issues
- Possesses excellent verbal and written communication skills especially of complex and quantitative topics
- Independent thinking, curiosity, creative problem solving skill
- With advanced Excel, Access, PowerPoint and good computer aptitude

Corporate title
- Intern

Division
- L&H Business Management

Department
- L&H Valuation team

Location
- Hong Kong

Application Deadline
- Open

Application Method
Interested parties can send your cv to Rebecca_Li@swissre.com (HR).
Job Descriptions
Company: Swiss Reinsurance Limited HK
Title: L&H Products – Central Pricing
Duration: 6 months Full Time Internship
Year: 2020 and 2021

Actuarial Analyst – Internship (6 months)

Swiss Re is one of the leading global reinsurers. We offer a wide range of traditional reinsurance products and related services, which are complemented by insurance-based corporate finance solutions and supplementary services. Our core business segments are: risk transfer, risk finance and asset management.

The goal of the Life & Health Products division is to ensure a strong, globally consistent focus across all life and health product lines. The Products function includes setting terms of trade for the appropriate Pricing of business, providing expertise and product development, and the production of research and publications as well as full service costing and underwriting support.

The Opportunity
Once hired for this position, you will be part of the regional pricing team under the Hub and will be expected to support the team of actuaries in providing services to our clients and assisting other offices around the Asia region. You will be gaining various kinds of exposure by working in a culturally diversified team with primary responsibilities including but are not limited to:

- Support in actuarial modelling of reinsurance pricing per client requests
- Carry out data analysis on experience studies and industry reports for assumptions setting
- Conduct researches on insurance-related topics
- Assist in completing regular pricing review requirements
- Participate in other ad-hoc projects as required

About You
- An actuarial student with exceptional academic performance and progress in exams with a recognised Actuarial body (IOA, IAA, SOA, CIA)
- Goal-oriented and a strong team player
- Has strong analytical skills, and the ability to handle both conceptual and practical issues
- Possesses excellent verbal and written communication skills, especially of complex and quantitative topics
- Independent thinking, curiosity, and creative problem solving skill
- With advanced Excel, Access, PowerPoint and good computer aptitude

Join our Graduates@Swiss Re programme

Swiss Re offers graduates the chance to join the exciting world of a specialised financial services organisation. We're looking for graduates with a strong track record of academic excellence, international experience and language skills. If you've just earned your degree and have little or no work experience, you might be the perfect fit for us.

On-the-job training

This 18-month training programme starts around the beginning of September each year and finishes at the end of February. You'll have your home base at one of our regional offices. Your personal mentor will support your integration into the new work environment and will provide additional support throughout the programme. You'll also get to attend training days especially designed for the programme. Over 16 to 20 weeks, you'll rotate once or twice to a different business area to gain further experience in another area of the company. Along with the rotation, classroom training and several events will give you opportunities to meet and network with other graduates and employees from different Swiss Re units.

Off-the-job training

Classroom-based training mainly focuses on technical skills, as our business is highly specialised. It consists of three general training blocks providing you with a combination of general business learning and basic technical modules. We also offer specialist training in reinsurance.

In addition, you'll receive two assignments to apply what you've learnt to the business context. This also gives us the opportunity to provide you with feedback on your work.

In the technical paper assignment, you'll be asked to leverage what you've learnt in the classroom. The paper will be sponsored and reviewed by your line manager. The project assignment is set up to introduce you to cross-functional project work around a business-related topic. A panel of senior Swiss Re business experts will present the findings of the project group to you.

How to apply

Our recruiting process is the same worldwide. To join the programme, you must at a minimum have a bachelor's degree before the starting date.

We have different recruitment timelines per region. Graduate positions will be posted at the start and for the duration of the application period in the relevant region. Please visit http://www.swissre.com/careers/ to check out the openings around August/September.
