WAKO Industrial Limited

Our business has identified a need to advance the current optical systems for our portfolio of lighting fixtures/products. As a SME, we see this as an opportunity for local student to understand and explore the LED lighting industry by offering hands-on product development and commercialization experience to the incumbent.

**Basic job description:**
- Identify and define the existing problems
- Prioritize issues, plan and conduct research and/or analyses
- Synthesize findings and generate recommendations and solution inclusive of designing and sourcing the new optical system
- Communicate progress and recommendations with manager on a timely basis

Depending on student’s capability and personal interests, the incumbent will gain knowledge on how the supply chain works in the industry.

**Job Requirement:**
- Major in Physics with strong interest in optics, PhD preferred
- Collaborative
- Good verbal and written Chinese and English, Knowledge of Japanese an advantage
- Excellent inter-personal communications skills
- Proactive in leading the tasks at hand

**Working Hours**
- We expect around 10-15 hours per week, with half day work in our office/workshop.
- The key is on the agreed deliverables. Working hours can be more flexible, virtual meetings could be feasible

**Contract Duration**
- 9 to 12 months initially; position could become permanent after further business potential assessment

**Remuneration**
- To be Discussed

**Date of Commencement**
- Immediate

Yours Faithfully,

Brian FUNG
