Core Assurance Associate - Hong Kong Graduate Programme

About Our Business

Audit and Assurance Service ('Assurance') is the largest service line in PwC China and Hong Kong. Assurance service today isn't only about compliance or merely following rules. It's helping our clients to navigate regulatory complexity and strengthen trust and transparency. By providing a balanced, objective opinion on financial statements, we help build trust between companies/investment banks and their stakeholders, including investors. It requires us go beyond the objectives and develop real judgment and insights into a client's markets, technology, people and management, as well as its finances, drawing on both technical knowledge and commercial experience.

Job description and Responsibilities

In Assurance you'll be part of the team that really interacts with every aspect of clients' activities; understanding what their business to identify where our high-quality audit can add insight and value. It's critical work that enhances corporate governance and plays an important role in ensuring the reliability and relevance of business information.

As you work with some of our most prestigious clients, you'll develop the business skills, knowledge and relationships you need to do well in a career that's about so much more than numbers. Put simply, our PwC Assurance teams ask questions, test assumptions, and evaluate whether companies are reporting information that investors and others can rely on.
